# Time series of data & economy related search term & topics summarized by their 1st princial components

These time series can be seen as the proxy of public interest to these topics in Germany

DataEcon
— Data
— Economy

Economy related search queries & topics's drop in 2008 is noteworthy. My best guess is that this is the time window where topics like economic crisis, economic recovery, kurzarbiet, unemployement & bankrupcy take over other topics like economic growth & invest.
